AN AMNESTY PROCLAMATION.

Pardon Soon Expected for All Army Deserters.

There seems to be good reasons for the belief that President Harrison will shortly issue a second "general amnesty" proclamation, granting pardon to all deserters from the army. The annual loss to the service from this cause is almost beyond belief, and the best minds at headquarters are constantly trying to formulate some plan which will bring the number of deserters down to the minimum. Referring to the subject, Colonel H. R. Misner, Seventeenth Infantry, commanding the post at Fort D. A. Russell, says:

"Good soldiers do not desert the service, and no better soldiers can be found than in this command. Old soldiers very rarely desert, desertions being generally confined to recruits. With all the comforts, recreations and indulgences in the garrison there have been nine desertions from this command this month, all without just cause. All the talk about young men being disgusted by the brutality or the coarseness of the old soldiers is simply rot. As a rule, old soldiers give the new ones their first lessons in decency. The youngest men are proverbially the worst."

It is said that in spite of Colonel Misner's views and the fact that the army and navy are recruited from the same class of outcasts, there are 90 per cent. more desertions from the former than from the latter arm of the service. Desertion is the great curse of the army, and one of the most intractable features of the whole thing is that the foreign-born recruits desert more easily than their duties than the native American. At least three-fifths of the army are of foreign birth, but scarcely half of the deserters are. The question has puzzled the war department officials more than a little, but so far, no remedy or, for that matter, no reason has been given why this state of affairs exists. The President's proclamation will remove the cloud which now hangs over thousands of young men, but whether that will act as an incentive to curb desertions is a question army officers are unable to answer.

Until Mrs. Harrison went to work with such vim several weeks ago the White House had not received so much attention in a number of years. Washington is a Southern climate, one favorable to the propagation of moths, flies, and ants, and the Executive Mansion, situated between the dusty banks of the river, low lying flats, and an immense quantity of vegetation, receives, of course, with every wind that blows its due share of the flying dust. Nothing but "eternal vigilance" can keep this down. Then again the south large looking room in which Garfield endured his long agony was hermetically closed during the Arthur and Cleveland regimes. Neither the widowed President nor the newly wedded pair required it; but Mrs. Harrison does. The furniture of this apartment is simple, and it contains two single brass beds. A heroic cleaning has made their apartment one of the most desirable of the private portion of the White House. "The Prince of Wales' room" is furnished in exactly that style which demands persistent attention. The imposing carved wood bedstead has a canopy, and all around the sides is an upholstered border which needs a great deal of care. It is indeed a noble chamber, the view from the two large windows across the White House grounds are over the Potomac to the heights beyond forming a panorama which nature herself can hardly surpass elsewhere.

Should the rule of seniority continue to govern in the selection of heads of staff in the army during the remainder of President Harrison's Administration the following officers will be advanced to the heads of their respective corps: Col. Charles H. Tompkins will become Quartermaster General upon the retirement of Gen. Holabird, June 16, 1890; Col. Beekman Dutary, Commissary General, in the place of Gen. McFerry, who retires July 1, 1890; Col. J. H. Baxter, surgeon General, vice Gen. Moore, who retires Aug. 16, 1890; Col. Rodney Smith, Paymaster General, to succeed Gen. Rochester, who reaches the retiring age next February; Robert Williams, Adjutant General, in place of Gen. Kinton, who retires June 21, 1892; and Col. Thomas G. Baylor, Chief of ordnance, in the place of Gen. B. net, who will be 64 years of age on June 22, 1891.

In the death of Leonard Sweet, Illinoisian, one of her most eminent citizens has been lost. He was the law partner of Lincoln, and was distinguished as an orator in nominating the martyr president in Chicago in 1860. Mr. Sweet held a leading position among the lawyers of the west, and his death is a great loss to the profession.

Dan Lamont is talked of as a Democratic candidate for Governor of New York at the expiration of David B. Hill's term.

Ex Senator Wm. E. Chandler has been re-nominated for Senator by the New Hampshire Republicans.

Blind Tom was not drowned at Johnstown, as reported. A change of date saved him.

Jay Gould is said to be in better health than he has been in fourteen years.

Swimming in the river is now the excitement.

"I owe you an apology, old boy," said Giles. "Never mind the apology," replied Merritt; "just let me have the Y."—Life.

ARID LANDS.

There is every indication that the work of surveying the arid regions of Nevada and the Territories will be pushed forward at an early day. The chiefs of divisions and heads of the surveying parties have been appointed and are already on the field. It remains for the President only to give the order whether the geographical survey or the civil service commission shall make the minor appointments before active operations begin. The work is necessarily a great undertaking. It is not intended to make complete detail maps of the country surveyed. But it is proposed to furnish the Government sufficient knowledge of the topography, water supply and hydraulic conditions of the irrigable lands within the arid district so as to demonstrate the practicability of reclaiming them. The problem to the engineers is how to store and distribute the waters properly, to the people of the States and Territories interested. The Journal is in receipt of the following letter upon the subject:

SPECIAL COMMITTEE ON IRRIGATION AND ARID LANDS,
UNITED STATES SENATE,
WASHINGTON, D. C., June 1, 1889.

To the Editor of STATE JOURNAL, Reno, Nevada:

Sir:—As you are aware, the United States Senate has appointed a Special Committee on Irrigation and the Reclamation of Arid Lands, and charged it with an inquiry into those subjects. Since Congress met at St. Paul, August last, and on that date will commence its tour of investigation. It will be accompanied by Director Powell, of the United States Geological Survey, and by an engineer expert assigned to its service.

The committee desires the active cooperation of the newspapers published within the dry area—that is, west of the 100th meridian of west longitude—in the work of arousing public attention to the importance of the great subject. It especially asks for their aid in the gathering of data and the collection of facts. It is unnecessary to recapitulate to you what those facts are, but their collection will be a matter of essential service in laying the foundation of intelligent opinions for legislative and other action in the future. Each district and section should endeavor to secure full and practical attention to its own conditions as far as possible.

It will prove of value to the committee's work if copies of any publication you may make are sent to the committee.

Feeling assured that you comprehend the importance of this investigation, and asking, therefore, your active aid, in such ways as your judgment determines, the committee leaves the matter with you.

Communications, papers, reports, maps, etc., may be addressed to U. S. Committee on Irrigation, (Care U. S. Geological Survey,) Washington, D. C. Letters of inquiry may be directed to: "Richard J. Hinton, Irrigation Engineer, (Care Director U. S. Geological Survey,) Washington, D. C."

The Special Committee consists of the following Senators:

Hon. Wm. M. Stewart, Carson, Nev. (Chairman); Hon. E. B. Farnham, Esmeralda; Hon. Wm. E. Aldrich, Dabney, Iowa; Hon. Frank H. Coker, Syracuse, N. Y.; Hon. J. K. Jones, Washington, Ark.; Hon. J. H. Reagan, Palestine, Tex.; Hon. A. P. Gorman, Laurel, Md.

The Journal is of the opinion that Governor Thomas, of Utah, has covered the matter desired by asking for information upon the following subjects:

1.—The location of all streams, rivers and irrigating canals. These should be shown on maps, sketches or tracings prepared on a scale of two inches to the mile.

2.—List of canals and ditches, giving as nearly complete as possible:

a.—Name of canal or ditch.

b.—Name of owners or officers and their postoffice addresses.

c.—Date when built or first in use.

d.—Streams from which the water is diverted.

f.—Number of acres irrigated, and of cultivated lands.

g.—Number of acres of good land so located that they could be irrigated by an increase of the water supply in the canals or ditches now constructed.

h.—Number of acres that could be irrigated by new ditches or canals, and new reservoirs.

i.—The available sites for reservoirs either in the valley or mountains, and the probable size of such reservoirs.

In addition to the above, you are requested to reply to the following questions:

1.—What is the average depth of snow in your mountains during the winter?

2.—When does the irrigation season begin and end in each valley?

3.—What is the elevation of each valley above the sea?

4.—How much water in miners' inches or in cubic feet per second flows through each stream in your country at the point where it can be used for irrigation during the irrigating season?

5.—How much water could be stored in suitable reservoirs during the rest of the year?

6.—How much water is required in each valley or locality to irrigate an acre of sandy soil for each crop (small grain, grass, root crops, corn, orchards, etc., etc.)?

7.—How much water is required to irrigate an acre of clayey or alkaline soil in each valley or locality for each crop as mentioned above?

8.—How often and how long at each time is the land irrigated?

9.—How many acres of crops have been lost this year from lack of water?

If the above information could be supplemented by a brief abstract from the county records of the water rights that have been recorded it would be of special interest to the committee and would give them reliable data showing the extent of the appropriation of the water supply. The abstract should show:

a.—The date of record.

b.—Name of claimant or grantee.

c.—The amount of water claimed, appropriated or adjudicated.

d.—Nature of claim, and whether a first, second or third right.

Why Sugar is Advanced.

WASHINGTON, June 11th.—Treasury officials familiar with the situation in the sugar market and the importation of that article, say that the advance in prices is due to the fact that the sugar trust realizes that Congress will have to do something towards removing the duty from sugar at its next session, and therefore they propose to run sugar to the highest notch before Congress has an opportunity to interfere in behalf of consumers. In other words, the sugar trust has determined to rob the people while they have a chance.

At Carson City, to-day, Charles Lyman, of the Civil Service Commission will make a special examination of those desiring positions as railroad mail clerks in this State.

ST. PAUL'S BREATHING PLACES.

Beautiful Little Parks All Over the City.

St. Paul, June 8.—[Special to the Omaha Bee.]—St. Paul had parks here and there, but no park system or park commission until February 25, 1887. Since that time Prof. H. W. S. Cleveland and a board of commissioners have done a great deal toward giving the saintly city an adequate number of breathing places. Members of the legislature from the city get the legislature to pass bills for the issuance of bonds for park purposes, and the citizens are taxed a small amount annually to provide for the retirement of these bonds when due. The park board is composed of eight members, who hold weekly meetings. The largest park in the city, and that to which the Board is giving most of its attention, is that at Lake Como. It is located about four miles from the center of the city on three lines of railways. It surrounds the lake, and contains over two hundred and fifty acres. Two years ago the city was bonded for \$25,000 for this park, and about \$12,000 of this amount has already been expended. The city works on its temporary location on the southwest corner of Como park, and the inmates are utilized in beautifying the grounds. During the year they have reopened the gravel ridges near the west shore of the lake and have filled and reclaimed about two acres of unsightly low ground that was formerly a part of the lake. By cutting away the ridges a splendid boulevard driveway has been built along the shore of the beautiful lake. A carriage concourse, 100 feet in diameter, on the highest point in the park, and commanding extensive views in different directions, was graded and surfaced. The gravel taken from the banks has been found of an excellent quality for surfacing, and large quantities have been used for that purpose. An iron road roller, weighing 3,000 pounds, about three feet in length and made of three sinter sections, was brought from Europe on a revolving shaft, has been kept continuously at work, compacting first the roadbed and then the gravel surfacing. To make the gravel retain an unbroken surface under carriage travel a finely divided stuff loam was placed beneath the top soil. This also insures freedom from seed. Another course of loam is mixed with the gravel, and this, when rolled, becomes cemented together and forms a smooth, hard roadbed that is almost impervious to water. Surface water is disposed of through trench drains made by digging pits and trenches and filling them with waste cobble stones picked from the surfacing gravel. In the vicinity of the principal park entrance, 740 feet of vitrified pipe drains and eight catch basins with iron gratings and side inlets have been constructed to receive and convey to the lake the large quantity of surface water that seeks an outlet at that point. To relieve the barrenness of the borders of the drives, native plants were selected and transplanted from the adjoining woods to the borders to the extent of 2,500 shrubs and 300 trees. Among the different shrubbery selected were cherry, dogwood, honeysuckle, roses, plum, thorn, smilack, hazel, alder, white birch, poplar, linden, etc. It is the intention to allow the wooded borders to run up thick with undergrowth, except at a few points where openings will give views to partially cleared ground fifty feet or more away. Of the trees planted in groups in Como park are 100 large evergreens, including white and Norway pines, spruces, juniper and arbutus, fifty smaller evergreens, 400 deciduous trees, chiefly white maple, but including elm, ash, boxelder, box elder and sugar maple. In the Park nursery there are 550 small spruce trees and a great deal of shrubbery of different kinds. The season has proved so propitious that only a few of the 6,500 trees planted in the park have been lost.

The building of flower beds has not yet been begun to any considerable extent. A temporary propagating house, 17x40 feet in size, and located as a lean-to against the southeast end of the old white farm house in the park, has been built. Here it is intended to cultivate bedding plants for the summer display in the park flower beds, vases, etc.

The other parks of the city are still handled by the council committee on parks, but will be turned over to the park commission in a short time. Enumerated they are as follows:

Summit square, containing 0.75 acres, located at Summit and Nelson avenues.

Holcombe Park, 0.40 acres, at Laurel avenue and St. Alban's street.

Croesus Place, 0.05 acres, Croesus Hill.

Carpenter Park, 2.04 acres, at the intersection of Summit avenue and Ramsey street.

Oakland Park, 1.83 acres, between Pleasant avenue and Oakland street.

Webster Park, 1.14 acres, at Pleasant avenue and Webster street.

Irvine park, 3.58 acres, at the intersection of Walnut and Franklin streets.

Rice park, 1.62 acres, Fourth and Washington streets.

Park place, 0.40 acres, St. Peter street and Summit avenue.

Central park, 2.23 acres, Summit avenue opposite Minnesota street.

Smith park, 2.03 acres, at Sixth and Sibley streets.

Lafayette square, 0.80 acres, Tenth and Grove streets.

Van Slyke place, 0.12 acres, near Maryland street.

Sunshine place, 0.12 acres, west of Chatsworth street.

LeRoy place, 0.13 acres, west of Chatsworth street.

Foundry park, 0.95 acres, east side of Arndel street, north of Como avenue.

Lewis park, 0.85 acres, north of elevator B.

Stinson park, 1.23 acres, Park and Maryland avenues.

Lytton park, 0.32 acre, Park avenue.

Stewart park, 1.36 acres, south of German street.

Lockwood park, 0.73 acres, west of Forest street.

Skidmore park, 0.39 acres, east of Earl street.

Clifton park, 0.45 acres, opposite Monard street.

Langford park, 8.66 acres, north of the Northern Pacific station.

Hampden park, 2.75 acres, south of the Manitoba railway.

Merriman park, 7.71 acres, south of St. Anthony street.

Hiawatha park, containing 49 acres on the east bank of the Mississippi, opposite the mouth of Minnesota creek.

The general park fund and the bond fund are kept separate. The original general fund amounted to \$200,000, and \$137,612 still remains unexpended. During the coming year it is the intention of the board to expend at least \$100,000 in beautifying the parks of the city.

WHAT ON EARTH

Is the reason people will not, can not or do not use any difference in cheap nontoxic pastes? Cheap John houses or irresponsible parties at enormous profits, rather than take a medicine of world wide reputation is giving universal satisfaction at a price? No medicine in the world is giving such unparalleled satisfaction in purifying the blood as BROWN'S BLOOD PURIFIER, AND BLOOD MAKER, and every bottle that does not do its work will cost you nothing.

250 Beautiful Lots For Sale!

A RARE CHANCE FOR AN INVESTMENT AND A HOME.

THE MOST LOVELY PORTION OF RENO.

Facing the Truckee—The Aristocratic Avenue—Riverside Driveway—Splendid Sewerage—Healthy Location and Safe From Fire.

The proprietor is now ready to receive proposals for lots in Powning's Addition. The map gives a good idea of the tract, which is situated between the Central Pacific Railroad and the Truckee River, and commences on the west at a point three blocks distant from Virginia Street, making it the most central and convenient of any portion of the rapidly growing town of Reno. Unlike any other part of the town this Addition faces the beautiful Truckee River and Riverside Avenue is certain to become the fashionable driveway of the country. The streets are 80 feet wide, while Riverside and Keystone Avenues are intended to be 100 feet in width. All alleys are 20 feet wide. The soil is a rich gravelly loam, and susceptible of the highest state of cultivation. Being situated as it is it is more safe from fire than any other section. The regular lots are 50x140 feet. The sewerage is perfect.

Before Buying Elsewhere Parties will do Well to Look at These Lots.

RENO

Reno's geographical position is excellent. It is on the line of the Central Pacific Railroad, only 164 miles from Sacramento, and 244 miles from San Francisco. It is the terminus of the Virginia and Truckee Railroad running south, and of the Nevada and California Railroad running north. It has two Flouring Mills, Planing Mills, three Nurseries, a Soap Factory, Reduction Works, and other industries. A great Woolen Mill and a Sash, Door, Blind and Box Factory, are about to be established.

Reno has the Bank of Nevada with \$300,000 capital, and the First National Bank with \$200,000 capital. It has two fine papers in the DAILY and WEEKLY NEVADA STATE JOURNAL and the Daily and Weekly Gazette.

Reno is the natural home of the Alfalfa, and therefore the great cattle headquarters of the State. Here are fed the prime beef for the California market. Reno potatoes are the best in the world, and she also excels in Strawberries and the small fruits. Reno Wheat took the first prize at the great New Orleans Exposition.

The State Fair is always held at Reno.

Reno is the County Seat of Washoe County, the wealthiest county in Nevada.

RENO!

Has 5,000 Population and is Growing Rapidly.

The Loveliest Town

The Cleanest Town.

The Healthiest Town!

The Healthiest Town!

RENO

Is Supported by the Richest

Farming Country of Nevada,

Northern California and South-

ern Oregon.

RENO

Has no equal in Nevada or California for salubrity of climate, wealth of soil, diversity of products and stability. Situated in the very heart of the celebrated Truckee Meadows the future of Reno is assured. Reno is the City of Homes. There is not a house to rent in Reno. New buildings are occupied as fast as erected. Reno has advantages which no other town can equal. The climate is mild and genial in Winter, and even and healthful in Summer. There are no excessively heated or severely cold terms, and while the days may be warm in Summer the nights are deliciously cool; in Winter sleigh-riding is the exception and not the rule.

Facilities for irrigating surpass any in the State and there is no failure of crops. Reno has Churches of all denominations, Bishop Whitaker's School for Girls, Mt. St. Mary's Academy, the State University, and splendid Public Schools.

The Reno Water Co. furnishes ample pure, cold water for all purposes. The Reno Electric Light Co.'s electric light system, already well established, is being augmented. The Reno Gas Co. supplies gas for all purposes. The streets of Reno are lighted by electricity.

RENO!

Is the Railroad Center of Nevada.
